“Be the change that you want to see in the world.”

Summary

Software engineer with several years of hands-on experience specializing in backend architecture, distributed systems, and cloud-native infrastructure. Proven ability to design and deliver reliable, scalable services in fast-paced product teams, with a strong record of measurable improvements in performance, cost efficiency, and engineering productivity.

Passionate about open-source projects and tech communities, and committed to continuous learning and knowledge sharing across teams.

Work Experience

Example Technology Company

City, Country

SOFTWARE ENGINEER

Sep. 2023 - Present

- Led the research and implementation of service mesh technology across enterprise cross-cluster environments, evaluating Istio, Cilium, and Consul for enhanced security and scalability.
- Designed Terraform modules to efficiently manage and scale infrastructure across dozens of cloud accounts, enabling standardized, repeatable deployments.

Example Internet Company

City, Country

SITE RELIABILITY ENGINEER

Mar. 2021 - Jun. 2023

- Designed and provisioned the entire cloud infrastructure to meet security compliance requirements for a financial service launched to millions of users.
- Continuously improved the infrastructure architecture since launching the service, keeping it reliable under sustained growth.
- Established a standardized base for declarative management of infrastructure and service deployments; over 90% of cloud resources were managed through reusable modules with GitOps workflows.
- Saved over 30% of overall cloud costs by introducing a purchasing strategy for reserved instances and cost-efficient compute options.
- Introduced an employee identity solution, establishing security policies and configuring SSO integration with over 20 enterprise systems.

Example Software Company

City, Country

SOFTWARE ENGINEER INTERN

Jul. 2020 - Feb. 2021

- Developed internal services for configuration management, reducing deployment errors across product teams.
- Improved monitoring and alerting coverage, cutting mean time to detect production incidents.

Honors & Awards

DOMESTIC AWARDS

2020 **1st Prize, National Programming Contest**, Example Organizing Committee

Country

2019 **Outstanding Student Scholarship**, Example University

City, Country

Certificates

2023 **Cloud Solutions Architect - Associate**, Example Cloud Provider

Country

2022 **Certified Kubernetes Administrator (CKA)**, Example Certification Body

Country

Education

Example University

City, Country

B.S. IN COMPUTER SCIENCE AND ENGINEERING

Mar. 2016 - Aug. 2020

- Received a departmental scholarship awarded to promising students in the CSE program.
