

[Your Name]

Objective: [Target Position]

☎ [+1 123-456-7890]

✉ [your.email@example.com]

📍 [City]

🐙 [github.com/yourname]

🎓 Education

[Example University] [B.S. in Computer Science]

[2020.09 - 2024.06]

[City, Country]

ter Networks
ot applicable

💼 Experience

[Example Technology Company] [Software Engineer]

[2024.07 - Present]

[City]

- Led the re-architecture of the order service, splitting monolithic APIs into 3 domain services and reducing average response time from 480ms to 120ms
- Designed and shipped a multi-tier caching solution, achieving a 92% hit rate on hot data and cutting peak database load by 65%
- Drove a slow-query remediation program, optimizing 30+ core SQL statements and reducing P95 latency by 75%

🔧 Projects

[E-commerce Middle Platform] [Python / FastAPI / MySQL / Redis]

[2024.03 - 2024.10]

- Background: [one sentence on the business problem and scale, e.g., supporting 500K daily orders]
- Key work: [architecture design / core modules / technical challenges, 1-2 bullets]
- Outcome: [quantified results, e.g., X% performance gain, awards, users served]

⚙️ Skills

- **Languages:** [Python (3 years of backend experience); familiar with Go, SQL]
- **Frameworks & Middleware:** [FastAPI / MySQL index tuning / Redis caching design]
- **Engineering:** [Docker deployment, Git collaboration, CI/CD pipelines]

👤 Summary

[2-3 sentences summarizing your differentiating strengths: domain focus + verifiable evidence. Avoid empty adjectives. Example: Backend engineer focused on e-commerce, with end-to-end experience from domain modeling to performance tuning; published 20+ technical blog posts.]
