EDUCATION

- **Example University** City, State
Master of Science in Computer Science; GPA: 4.00 *Aug 2019 – Dec 2021*
- **Example Institute of Technology** City, Country
Bachelor of Engineering in Electrical and Electronics; GPA: 3.66 *Aug 2015 – July 2019*

EXPERIENCE

- **Example Technology Company** City, State
Software Engineer *Oct 2022 – Present*
 - **Machine Learning Platform:** Worked on APIs and performance optimization for training large models on accelerated hardware, serving internal teams with a unified training interface.
 - **Data Pipeline:** Built a unified model for defining batch and streaming data-parallel processing pipelines, with language-specific SDKs for constructing pipelines and runners.
- **Example Internet Company** City, State
Senior Software Engineer *Jan 2020 – Oct 2022*
 - **Notification Service:** Service for sending email, push and in-app notifications. Involved in delivery time optimization, tracking, queuing and A/B testing.
 - **Data Transfer:** Bulk data processing and injection service between distributed storage systems, providing a thin REST layer for serving offline computed data online.
 - **Workflow Framework:** Designed an open-source workflow framework to create and manage data pipelines, leveraging reusable patterns to expedite developer productivity.
 - **Data Warehousing:** Setup, schema design and management of a cloud data warehouse; built an internal web interface for data access and daily ETL integration.
 - **Recommendation System:** Core service for recommendation systems used across the platform, covering both offline training and online serving.
 - **Content Discovery:** Improved content discovery by redesigning the onboarding experience and personalizing search and browse, plus ranking and indexing improvements.
- **Example Research Lab** City, State
Data Scientist Intern *Summer 2021*
 - **Portfolio Analytics:** Created models for portfolio hedging, optimization and price forecasting; built a strategy backtesting engine for simulating strategies.
 - **Web Application:** Python backend for a web application used by financial analysts for portfolio management.

PROJECTS

- **Open Source Toolkit:** Open source Python library for data analysis and machine learning workflows.
- **Data Visualization:** Interactive visualization of version control log data to analyze project trends over time.
- **Recommendation System:** Music and movie recommender systems using collaborative filtering on public datasets.
